

{css}
anatomy

```
selector { property: value; }
```

selector

h1

{

color:

property

blue;

value

}

```
h1 {  
    font-family: "Courier New";  
    text-align: center;  
    font-size: 30px;  
    color: blue;  
}
```

```
selector { property: value; }
```

Selector

- Digunakan untuk memilih dan memanipulasi elemen spesifik pada HTML.
- Elemen HTML dipilih berdasarkan tag, id, class bahkan pola / pattern.
- Semakin kompleks struktur HTML, selector juga bisa semakin kompleks / spesifik

Selector

```
h1 { color: blue; }
```

dibaca: CSS, pilih seluruh elemen h1, lalu ubah teks didalamnya menjadi berwarna biru

```
selector { property: value; }
```
